

Bisoprolol

General:

Bisoprolol belongs to a class of drugs called beta-adrenergic receptor blocking agents that also includes propranolol, atenolol, and timolol. Bisoprolol is used for treating high blood pressure and heart pain (angina). Bi-soprolol prevents the neurotransmitters norepinephrine and epinephrine (adrenaline), from binding to beta receptors on nerves.

Indication: Therapy monitoring

Material: 1 ml serum

TAT: 7-10 days*

Method: LCMS

Units: µg/l

Ref.- range: 10.0 - 100.0
