

CA 50

General:

CA-50 is a carbohydrate antigen found on the surface of epithelial tumors and it seems to represent a general tumor-associated antigen. Its occurrence is not organ or tissue specific. The test is not useful as a screening test but it is of additional help, e.g. for CA 19-9 confirmation.

Material: 1 ml serum

TAT: 7-10 days*

Method: IRMA

Units: U/ml

Ref.- range: < 23.5
